

Product Name:

Bloom TripleClear Serum

Triple Acid Spot Killer

Triple Acid Anti-Acne & Brightening Treatment

Product Overview

Bloom TripleClear Serum is a clinically inspired, multi-action treatment that combines three pharmaceutical-grade acids with targeted brighteners to combat acne, unclog pores, fade post-acne marks and reveal visibly clearer, brighter skin. Optimized at pH 3.5–3.8 for maximum bioavailability, this serum delivers professional-level results with minimal irritation thanks to patented solubility technology using Betaine.

Benefits on Skin

- Visibly reduces active breakouts and prevents new formation .
- Deeply clears and refines pores.
- Fades dark spots and post-inflammatory hyperpigmentation .
- Improves skin texture and radiance .
- Soothes redness and inflammation while maintaining barrier integrity.

Key Active Ingredients

- **Glycolic Acid 7% (AHA):** Rapid surface exfoliation, brightens and smooths texture.
- **Lactic Acid 3% (AHA):** Gentle exfoliation + intense hydration.
- **Salicylic Acid 2% (BHA):** Oil-soluble penetration into pores to dissolve sebum and debris.
- **Alpha-Arbutin 2%:** Clinically proven melanin inhibitor for spot correction.
- **Betaine + Allantoin:** Forms protective complex with Salicylic Acid, enhances solubility, reduces irritation and boosts hydration.

Synergistic Triple Acid Technology AHAs resurface the skin while BHA works from within. Alpha-Arbutin targets discoloration at the source. Betaine stabilizes the acids at low pH, allowing powerful performance with exceptional gentleness.

HOME CARE PROTOCOL:

1. **Preparation:** Cleanse skin thoroughly. Dry completely.
2. **Application:** Apply a thin layer to the face or affected areas.
3. **Duration:** Leave on overnight (Do NOT rinse).
4. **Sensation:** Slight tingling upon application is expected..
5. **Frequency:**
Week 1: Use 2 nights per week.
Week 2+: Increase to 3-4 nights per week (every other night).
6. **Post-Care:** Apply a light moisturizer after absorption. Strict daily sunscreen use is required.

PROFESSIONAL CLINIC PROTOCOL :

Use Phase: Use as a "Chemical Peel" step or "Spot Treatment" after extraction.

Step 1 (Prep): Degrease skin with alcohol or pre-peel solution.

Step 2 (Application): Apply a uniform layer using a brush.

Step 3 (Activation): Leave on for 5 to 7 minutes (Monitor for frosting or excessive redness).

Step 4 (Neutralization): Rinse thoroughly with cold water or bicarbonate solution to stop acid activity.

Step 5 (Finish): Apply a calming mask and barrier repair cream.

Session Interval: One session every 14 days.

Caution: Do not perform microdermabrasion in the same session.

Storage Instructions:

- Store in a cool, dry place below 18°C / 70°F. Keep away from direct sunlight. Use within 12 months after opening.

Safety & Quality Assurance:

- Dermatologist-inspired & stability tested.
- pH 3.5–3.8 (optimal for acid efficacy).
- Cruelty-free, Fragrance-free, Paraben-free.
- Microbial & heavy metal tested.
