

Product Name:

Lactic Glow Peel 10

Hydrating & Brightening Serum

Sensitive, Dry, Dehydrated & Pigmented Skin

Product Overview

Lactic Glow Peel 10 is a luxurious, lightweight gel mask specifically formulated for sensitive, dry, dehydrated and blemish-prone skin. With a gentle blend of 8% Lactic Acid and 2% Glycolic Acid at skin-friendly pH 3.8–4.0, it delivers effective yet soothing exfoliation, deep hydration and visible brightening while respecting the skin's delicate barrier.

Benefits on Skin

- Provides intense, long-lasting hydration.
- Gently exfoliates to reveal smoother, brighter skin.
- Reduces the appearance of fine lines and dullness.
- Fades dark spots and melasma safely.
- Calms redness and sensitivity, Leaves skin plump, radiant and comforted.

Key Active Ingredients

- **Lactic Acid 8% (AHA):** Gentle exfoliation + powerful humectant that binds moisture to the skin.
- **Glycolic Acid 2% (AHA):** Boosts mild resurfacing without irritation.
- **Alpha-Arbutin 2%:** Clinically proven brightener that inhibits melanin production.
- **Bisabolol 0.5% + Allantoin 0.5%:** Potent soothing and anti-redness agents.
- **Betaine 4% + Glycerin 5%:** Advanced hydration complex that protects skin cells and prevents dryness.

Synergistic Hydro-Lactic Technology Lactic Acid delivers hydration while exfoliating, Glycolic enhances glow, Alpha-Arbutin targets pigmentation, and the soothing-hydrating duo (Bisabolol + Betaine) ensures comfort even for the most sensitive skin. The result is visible radiance without the sting.

HOME CARE PROTOCOL:

- 1. Preparation:** Cleanse skin and pat dry.
- 2. Application:** Apply a generous layer to the face (avoiding eye contour).
- 3. Duration:** Leave on for 10 to 15 minutes.
- 4. Sensation:** Mild tingling is normal.
- 5. Removal:** Rinse thoroughly with lukewarm water.
- 6. Post-Care:** Apply a rich moisturizer or facial oil immediately.
- 7. Frequency:** Use 1 to 2 times per week.
- 8. Sun Protection:** Must use sunscreen the next morning.

PROFESSIONAL CLINIC PROTOCOL:

Use Phase: Use as an "Exfoliating Mask" or "Pre-Treatment" step.

Step 1 (Prep): Cleanse and degrease the skin.

Step 2 (Application): Apply with a fan brush. Safe to use with steam? No. (Heat may irritate sensitive skin with acids).

Step 3 (Activation): Leave on for 10 minutes.

Step 4 (Removal): Remove gently with wet sponges.

Step 5 (Extraction): Comedone extraction can be performed immediately after this step (skin is softened).

Step 6 (Finish): Apply a cooling alginate mask or hyaluronic acid serum with Cold Hammer/Ice Globes.

Session Interval: One session every 7 to 10 days.

Course: Recommended course of 6 sessions.

Storage Instructions:

- Store in a cool, dry place below 18°C / 70°F. Keep away from direct sunlight. Use within 12 months after opening.

Safety & Quality Assurance:

- Dermatologist-inspired & stability tested.
- pH 3.5–3.8 (optimal for acid efficacy).
- Cruelty-free, Fragrance-free, Paraben-free.
- Microbial & heavy metal tested.
