

Product Name:

C-Absolute Serum

The Waterless Clinical C+A+K Complex

Zero Oil. Zero Water. Zero Compromise

Product Overview

C-Absolute represents a paradigm shift in topical skincare. It is a groundbreaking, anhydrous (waterless) clinical serum, meticulously engineered in a 100% lipid-free base. By eliminating water and oil, this formula delivers the highest possible concentration of active molecules in a pristine, crystal-clear vehicle. The result is a pharmaceutical-grade, "Crystal Clear" solution that transcends conventional serums, offering immediate biological activity and unparalleled stability.

Benefits on Skin

Total Hydrolysis: The absence of water prevents the premature hydrolysis (degradation) of Vitamin C, ensuring 100% potency at the time of application.

Deep Penetration: The unique low-molecular-weight solvent system allows the actives to bypass the skin's lipid barrier and penetrate directly into the dermis.

Stable Formulation: Hypoallergenic and non-comedogenic. The anhydrous system requires no preservatives, parabens, or artificial stabilizers.

Corrective Action: Clinically significant action against melasma, post-inflammatory hyperpigmentation, and age spots.

Key Active Ingredients

- **L-ASCORBIC ACID (5%):** The purest and most bioavailable form of Vitamin C. Sourced at the highest purity grade, it acts as an essential cofactor for collagen synthesis, instantly brightening the complexion while providing potent antioxidant protection against environmental aggressors.
- **ALPHA-ARBUTIN (2%):** A premium, biosynthetic derivative of hydroquinone. This advanced skin-lightening agent acts as a direct, potent inhibitor of tyrosinase, effectively interrupting melanin synthesis at its source to target even the most stubborn, resistant hyperpigmentation.
- **KOJIC ACID (1%):** A highly refined, natural fungal derivative. It functions as a powerful copper chelator, "paralyzing" the enzymatic activity required for melanin production, thereby ensuring a uniform and radiant skin tone.

DIRECTIONS FOR USE:

1. **Cleanse:** Ensure the face is thoroughly cleansed and completely **dry**. Any residual water may cause a temporary, mild tingling sensation.
2. **Activation:** Apply 4 to 5 drops of the C-Absolute serum to the palm of your hand.
3. **Application:** Gently massage the serum into the face, neck, and décolleté using light, upward strokes. Avoid the immediate eye area.
4. **Absorption:** Allow 2-3 minutes for the serum to fully absorb before applying subsequent products (moisturizer or sunscreen).
5. **Frequency:** Start with once daily (evening) to assess tolerance. For optimal results, use twice daily (morning and evening) after the initial adaptation period.

INDICATIONS:

Target: Ideal for all skin types seeking advanced brightening and anti-aging interventions.

Specific Concerns:

- **Melasma & Chloasma:** Especially for persistent, treatment-resistant pigmentation.
- **Post-Inflammatory Hyperpigmentation (PIH):** Acne scars, sun spots, and freckles.
- **Photoaging:** Dull, tired skin requiring revitalization and collagen restoration.
- **Mature Skin:** To improve elasticity, hydration, and overall skin density.

SAFETY & PRECAUTIONS:

- **Allergy Test:** As with any active ingredient, perform a patch test on the inner forearm 24 hours prior to first use.
- **Sensitivity:** A temporary, slight tingling or warming sensation is normal and indicates active penetration.
- **Contraindications:** Do not use on broken, irritated, or compromised skin. If severe irritation or redness occurs, discontinue use and consult a dermatologist.
- **Exfoliation:** Avoid simultaneous use with high concentrations of retinol or harsh exfoliating acids (e.g., Glycolic Acid 10%+) unless under professional supervision.
